

☆☆☆ Day 135 ☆☆☆

of Our Daily UiPath Q&A Challenge!

Welcome to Day 135 of our exciting  
UiPath Q&A Challenge! Each day,  
we'll be answering one key question  
to help you master UiPath and  
revolutionize your automation  
journey. 🚀

➡ Question for Today

How can you write a DataTable to an  
Excel file in UiPath?

To write a DataTable to an Excel file in UiPath, you can use either Excel activities or Workbook activities, depending on whether Microsoft Excel is installed on the machine.

## ✓ 1. Using Excel Activities (Requires Excel installed)

- Activity: Write Range (under Excel category)
- Container: Place it inside an Excel Application Scope
- AddHeaders: Check this if you want column headers written.

## ✓ 2. Using Workbook Activities (No need for Excel installed)

- Activity: Write Range (under Workbook category)
- No Excel Application Scope is required
