🌟🌟🌟 Day 142 🌟🌟🌟
of Our Daily UiPath Q&A Challenge!

Welcome to Day 142 of our exciting UiPath Q&A Challenge! Each day, we'll be answering one key question to help you master UiPath and revolutionize your automation journey. 🚀

⛔ Question for Today

What does the 'Visible' property in Excel Application Scope do?

The 'Visible' property in the Excel Application Scope activity in UiPath controls whether the Excel application window is shown to the user during automation.

🔍 Explanation 🔍

- Visible = True (Checked):
    - Excel opens in normal (visible) mode.
    - You can see the Excel window during automation.
    - Useful for debugging or when you want to observe actions in real time.

- Visible = False (Unchecked):
    - Excel runs in the background (hidden mode).
    - No Excel window is shown to the user.
    - Improves performance and is recommended for unattended robots.
